Custom Calendar is a lightweight Vista gadget that places a small calendar on your screen which can be moved to any area of the desktop. It comes in handy for all users who are constantly looking for a new desktop enhancement utility. The gadget sports a clean and

---

simple layout that offers only configuration settings to tinker with. Custom Calendar gives you the possibility to view the current day, and go to the previous or next month. Other handy parameters worth mentioning enable you to customize the top, middle, and bottom text in terms of font, font style, and color, pick a background color or upload an image from the computer, as well as reset the program to its default settings. Since it doesn't require much

---

computer knowledge to work with Custom Calendar, even less experienced users can master the utility with minimum effort. However, professional users may find it pretty inconvenient to work with a tool that doesn't come packed with any advanced features. You cannot add notes and set up reminders, just to name a few suggestions. During our testing we have noticed that Custom Calendar offers good image quality, and no errors
